

STRABAG Portal for Suppliers – Commodities

1 Commodities

The commodities of STRABAG SE are mapped in a *commodities structure*. This list includes the commodities for representation of your range of services in the STRABAG Portal for Suppliers.

Services can be mapped in very different degrees of detail. We have therefore made a conscious decision to offer you all the selection options via a hierarchical list.

The list is arranged alphabetically and can be searched by scrolling from A-Z or can be filtered via the *Business areas* and/or *Market categories* filters.

The screenshot shows the 'Select Commodities' window with the following elements:

- Buttons: 'Take over' (green), 'Reset and Close' (grey).
- Filters: 'Business areas' and 'Market categories' dropdown menus.
- Options: Limit to my scope, Select only validated commodities, Expert Search.
- Keyword: A text input field.
- Buttons: 'Search' (with magnifying glass icon) and 'Reset'.
- Filters summary: 'Filters: Select only validated commodities: ✓ ✕'.
- Check all: Check all.
- Commodity list:
 - AHU ventilation and air-conditioning systems
 - Auxiliary building materials / Consumables / Wear parts (C articles)
 - Binding Agent
 - Bridge construction
 - Building automation
 - Building material test
 - Building materials merchant
 - Building preservation, refurbishment
 - Bulk material
 - Certification
 - Chemical products
 - Claddings

The hit list only appears after entering a search term in *Keyword* and clicking on *Search*.

The screenshot shows the 'Select Commodities' window after a search for 'Engineering':

- Buttons: 'Take over' (green), 'Reset and Close' (grey).
- Filters: 'Business areas' and 'Market categories' dropdown menus.
- Options: Limit to my scope, Select only validated commodities, Expert Search.
- Keyword: 'Engineering' (highlighted with a red box).
- Buttons: 'Search' (with magnifying glass icon) and 'Reset'.
- Filters summary: 'Filters: Select only validated commodities: ✓ ✕ Keyword: Engineering ✕'.
- Check all: Check all.
- Commodity list:
 - Personnel Performance
 - Design
 - Third-party engineering
 - Documentation
 - Engineering Approval planning
 - Engineering CE conformity
 - Engineering Commissioning, test operation

2 Subgroups

Click on the "+" or "-" symbols to show and hide the subordinate partial services.

The partial services are also arranged alphabetically.

Check all

- AHU ventilation and air-conditioning systems
- Auxiliary building materials / Consumables / Wear parts (C articles)
 - Drilling, cutting and sawing technology
 - Electrical engineering
 - Hydraulics
 - Hydraulic connection technology
 - Hydraulic systems
 - Hydraulic valves

3 Selection

Please select from this list all the services you would like to offer.

Select each *commodity* in the list individually.

To do this, click in the appropriate selection box to set a *check mark*.

Please note that subordinate commodities are not automatically selected with the higher-level term.

Check all

- AHU ventilation and air-conditioning systems
 - Air conditioning / partial air conditioning
 - Air treatment plants
- Ventilation duct systems
 - Channel air handling
 - Air passages
 - Flap ventilation
 - Ventilation grilles
 - Ventilation valves
 - Volume flow controller ventilation
 - Fire protection flaps

4 Business areas and market categories

Business areas

You can narrow down the list of all commodities using this filter if the services you offer belong to a specific *business area*.

Only business areas represented in the STRABAG Group are available for selection. Multiple selection is possible.

SPS – STRABAG Portal for Suppliers - Commodities

The screenshot shows the 'Select Commodities' window with the 'Business areas' dropdown menu open. The menu items are: Construction materials (BHG), Railway construction, BMTI, Bridge construction, and BRVZ. The 'Business areas' filter is currently set to 'Ground engineering' and 'Environmental technology'. The 'Market categories' dropdown is closed. The 'Filters' section at the bottom shows 'Select only validated commodities' as checked and 'Business areas' as 'Ground engineering' and 'Environmental technology'.

Market categories

You can narrow down the list of all commodities using this filter if the services you offer belong to a specific *market category*.

Market categories are used to combine commodities according to their relevance in the STRABAG Group. Multiple selection is also possible here.

The screenshot shows the 'Select Commodities' window with the 'Market categories' dropdown menu open. The menu items are: Building construction, Outdoor facilities, Consolidation, Building materials trade, Roof, Power, and Disposal. The 'Market categories' filter is currently set to 'Building construction' and 'Outdoor facilities'. The 'Business areas' filter remains 'Ground engineering' and 'Environmental technology'. The 'Filters' section at the bottom now includes 'Market categories' as 'Building construction' and 'Outdoor facilities'.

All filters set are shown above the search list.

The screenshot shows the 'Select Commodities' window with the 'Keyword' field empty. The 'Filters' section at the bottom is highlighted with a red box. It shows 'Select only validated commodities' as checked, 'Business areas' as 'Ground engineering' and 'Environmental technology', and 'Market categories' as 'Building construction' and 'Outdoor facilities'.

5 Search term

Use the search term to define the actual search in the displayed list of prefiltered commodities.

To do this, enter a search term into the field *Keyword* (at least three letters). The number of results found is displayed.

SPS – STRABAG Portal for Suppliers - Commodities

The search result displays commodities which contain the search term entered in the word itself, as well as the hierarchically higher-level commodities, and also the commodities which have the search term stored as a synonym.

Due to the synonyms, results may be displayed that do not contain the search term itself, but are related to it in terms of content.

Filters Select only validated commodities: Keyword: Engineering

Check all

- Personnel Performance
- Design
 - Third-party engineering
 - Documentation
 - Engineering Approval planning
 - Engineering CE conformity
 - Engineering Commissioning, test operation

When using the *expert search*, you will be offered the complete commodity tree.

This allows you to select commodities that do not match your search term, but are related to it due to their hierarchical classification. Please do not forget to select the commodities as described above, if necessary.

Check all

- AHU ventilation and air-conditioning systems
- Auxiliary building materials / Consumables / Wear parts (C articles)
 - Drilling, cutting and sawing technology
 - Electronical engineering
 - Batteries / rechargeable batteries
 - Cable conduits
 - Cable various
 - Distributor construction material
 - Duct
 - Electrical / Electronic components
 - Electrical control cabinets / components

To take over selected commodities, please click on the button *Submit*. This creates the selected commodities as your range of services.

6 Specify commodity attributes

The *commodity attributes* are specified on the next page. The attributes can be individually customised for each commodity that you have selected.

Use the *pencil icon* to edit the attributes.

COMMODITY ATTRIBUTES				
Label	Order types	Area of Operation (radius)	Main Family	Area of Operation (countries)
 Demolition	<ul style="list-style-type: none"> Contract for Work - Full Service Worker Allocation 	<50km	Yes	<ul style="list-style-type: none"> GERMANY
 Building-demolition	<ul style="list-style-type: none"> Contract for Work - Full Service Worker Allocation 	<50km	Yes	<ul style="list-style-type: none"> AUSTRIA GERMANY

The next step defines the *Area of operation (radius)*, *Order types* and *Area of operation (countries)* per commodity.

In addition, it is possible to determine whether this is a main commodity (main service/family) or an ancillary service.

A main commodity refers to the service for which you would accept an order without performing any other service, e. g. laying tiles (main service), grouting work (ancillary service).

COMMODITY ATTRIBUTES ⌵ ⌵ ✕

Save Save & Close

Supplier: ABR ABFALL BEHANDLUNG UND RECYCLING GMBH Commodity: Demolition

Geographical radius*: <50km Main Family

Auftragstypen*: Contract for Work - Full Service ✕ Worker Allocation ✕ Einsatzgebiet (Länder)*: AUSTRIA ✕ GERMANY ✕

Please note:

- The distinctions according to partial services, such as *Planning of...*, *Delivery of...*, *Installation of...*, are not mapped in the commodity structure.
- First, define one or more commodities. After these have been specified, select various attributes according to commodity to show your service in greater detail.
- Articles are not listed in the commodity structure.
- The better you assign your service profile via the commodities, the more precisely the invitations to tender you receive in future will be tailored to your range of services.
